

# Ratification of the Kigali Amendment will support the **Connecticut Economy**

Industries based on fluorocarbons play a large role in the U.S. economy. The technologies used by these industries across the globe are signature American innovations. Fluorocarbon-based manufacturing industries in the U.S. directly employ 589,000 Americans, with an industry-wide payroll of more than \$39 billion per year.

The Kigali Amendment will create 33,000 American jobs in less than 10 years, and will generate \$3.0 billion in additional labor income. These jobs and investment are in jeopardy if the U.S. government fails to act.

We must maintain American leadership in fluorocarbon product manufacturing.

---

## How ratification of the Kigali Amendment will help Connecticut:

### American Leadership:

- The amendment enhances America's place as a leading global supplier of HVACR products by providing a flexible and predictable implementation mechanism for recent amendments to the Montreal Protocol, giving U.S. HVACR companies and workers the opportunity to reap the benefits of American technological advances.

### Jobs & Manufacturing:

- Alliance members directly employ 1,480 employees in the state of Connecticut.
- HVACR upstream- downstream employment: 8,199 employees in the state of Connecticut.

### Alliance Member Companies in Connecticut:

- Solvay, Emerson, Honeywell, Johnson Controls, Lennox, Rheem
